

Aarhus Airport is working on a development project in which parking areas and building roofs are being investigated as potential energy centres that can produce green electricity for the airport and ...

In conclusion, Aarhus offers a viable environment for generating solar power year-round despite seasonal fluctuations in energy production levels and occasional weather-related challenges.

German solar developer Belectric is set to construct a 135 MW solar park near Aarhus, Denmark. The project, which was first announced during Intersolar Europe in June, will involve the...

Solar power plants with a similar production size are usually only seen carried out as solar farms on the ground here in Denmark, and you have to look abroad to find similar projects carried...

Members of the cooperative crowdfund and co-own a rooftop photovoltaic installation on two buildings at Aarhus University (AU). The aim of the cooperative is to provide its members and the local areas ...

Denmark has lower solar insolation than many countries closer to Equator, but lower temperatures increase production. Modern solar cells decrease production by 0.25% per year.

The world's largest rooftop solar plant is located in Horsens, Denmark, and was commissioned in September 2025.

Aarhus solar project I is an operating solar photovoltaic (PV) farm in Aarhus, Central Denmark Region, Denmark.

BELECTRIC is building a 135-MWp solar power plant over an area the size of 175 football fields for its new partner NRGi Renewables. It is anticipated that over 220.000 modules on site will ...

Copenhagen and Aarhus, Denmark, 12 June, 2024 - SPK has selected Danske Commodities as its electricity optimisation partner for the Kassø Power-to-X facility located in ...

Aarhus Denmark Solar 5v 5000 mW
