

Australian all-vanadium flow battery project

Australian Vanadium Limited says its integrated vanadium and manufacturing capability underpins an Expression of Interest submitted for the Western Australian Government's proposed ...

China's Enerflow will partner with Australia's JENMI to jointly develop a 350MW/1,200MWh long-duration storage project, marking a major step for vanadium flow technology ...

The project aims to create a modular, scalable, and utility-scale vanadium flow battery energy storage system (BESS) that is both cost-effective and home-grown, supporting AVL's "pit to ...

Premier Roger Cook said during the election campaign that the 50-megawatt, \$150 million battery would use locally sourced and processed vanadium. Under Labor's plan, the battery would be ...

The long-duration energy storage project - backed by a A\$150-million state funding commitment - aims to deliver a locally manufactured 500 MWh vanadium flow battery (VFB) by 2029 ...

Perth-headquartered Australian Vanadium Limited's subsidiary VSUN Energy has moved a vanadium flow battery project to a design phase with the aim to develop a home-grown modular, ...

A locally made and sourced vanadium flow battery will create jobs during construction, deliver improved energy resilience for the region and complement other planned upgrades in the ...

In late November, the state government launched the first stage of an expression of interest (EOI) for a 50MW/500MWh (10-hour duration) VRFB energy storage project, to be built in ...

Western Australia's Labor government has pledged \$150 million toward constructing Australia's largest vanadium flow battery in Kalgoorlie-Boulder. With a planned capacity of 50 ...
