

Engie and Sungrow have commissioned the first 400 MWh phase of mainland Europe's largest battery energy storage system in Vilvoorde, Belgium, with full capacity due by end-2025.

Discover how industrial batteries and smart EMS systems drive energy transition in Belgium: cut costs, earn flexibility revenues, and meet EU targets.

This partnership is fully aligned with our BESS expertise and our goal of achieving a carbon neutral future. We look forward, together with our partners, to bringing this project to life and ...

This study assesses SLB in Belgium, considering three second-life use cases: residential, industrial, and utility.

Belgium is stepping decisively into the European battery storage arena. Once a relatively small player in the sector, the country's integration into the PICASSO platform in late 2024 and the...

Sungrow has commissioned the first 400MWh of ENGIE's 200MW/800MWh battery energy storage system (BESS) in Vilvoorde, Belgium -- the largest such facility in mainland Europe. ...

Belgium has a unique energy mix: limited hydro potential, high population density, and ambitious plans to phase out nuclear and fossil fuels. The high share of wind and solar increasingly ...

Europe's energy storage market is expanding at an unprecedented rate. According to industry reports, the continent's battery storage capacity could surpass 100 GW by 2030. This growth ...

Discover key insights on Belgium's fast-growing 3 GW BESS pipeline. Explore trends, deals, and grid challenges shaping the country's energy future.

Belgium is one of the most active and mature grid-scale energy storage markets in Europe, with diversified opportunities for monetising battery storage via flexibility markets and a ...
