What is a box junction? A box junction is a type of traffic-control measure consisting of a square or rectangular set of yellow lines, criss-crossed with further diagonal yellow lines.

What is a Box junction? A box junction is a road traffic control measure designed to prevent congestion and gridlock at junctions.

Box junctions are likely to be part of the driving test if there is one within reasonable distance of the driving test centre where you are taking your practical test. Understanding correctly how to use a ...

A box junction is a traffic control measure designed to prevent gridlock at junctions. It's easy to recognise - in the UK, it's a yellow box filled with criss-cross yellow lines painted on the road.

In this guide, we'll explain all the rules surrounding box junctions, including the fines that can apply if you use them incorrectly.

A box junction is a road traffic control measure designed to prevent congestion and ensure the smooth flow of vehicles through busy intersections. It is characterised by a grid of criss ...

A box junction is a road traffic control measure designed to prevent congestion and gridlock at junctions. The surface of the junction is typically marked with a yellow criss-cross grid of diagonal painted lines (or only two lines crossing each other in the box), and vehicles may not enter the area so marked unless their exit from the junction is clear, or they are intending to turn and are prevented from doing so by oncoming traf...

In this guide, we'll cover what a box junction is, box junction rules, when you're allowed to wait in one, turning right, fines, and practical tips to keep you moving safely.
