

Brazil heavy industry energy storage vehicle

Rapid growth of electric vehicles and charging infrastructure is accelerating the adoption of advanced battery technologies. Utilities across Brazil are investing heavily in large-scale storage ...

Progress in heavy-duty electromobility in Brazil has been significant in recent years, especially in the heavy vehicle segment. However, this growth faces a critical bottleneck: the current charging ...

For Brazil, the 2026 auction could serve as a watershed moment -- defining not just how storage integrates into its National Interconnected System, but how the country approaches reliability ...

At the event, FTXT Energy Tech unveiled a hydrogen-powered heavy-duty truck featuring its core hydrogen system. The truck will soon begin road testing in Brazil in collaboration with the University ...

This article offers an in-depth examination of technological alternatives for decarbonizing the heavy-duty truck sector in Brazil, with a special focus on the state of S#227;o Paulo, evaluating their ...

For Huawei, the combination of ultra-fast charging, solar generation, and battery energy storage systems is the key to enabling large-scale electric mobility in Brazil.

GWM's hydrogen-powered truck arrives in Brazil for testing, equipped with a 539 hp motor and a 500 km range, aiming to boost local FCEV development.

This 49-ton tractor, powered by a core system from Visionary Energy, is not only the first hydrogen-powered heavy truck to hit the ground in South America but also marks the official entry of ...

Prove that this zero-emission technology can haul heavy loads, top up in minutes, and run on both green hydrogen and ethanol-sourced hydrogen. Over 1,000 km of real-world trials will ...

Explore Brazil's battery energy storage systems, focusing on current regulations, investment opportunities, and the role of these systems in the energy transition.
