

Bulgaria power plant energy storage power station project

Bulgaria is taking bold steps toward a greener energy future, having recently wrapped up its most ambitious energy storage tender to date.

Bulgaria is continuing its big battery rollout with the government announcing the commissioning yesterday (8 January) of one of Eastern Europe's biggest battery energy storage ...

The tender was launched last year, aiming to significantly increase the share of renewable energy, mainly wind and solar, in the country's energy mix. It would also contribute to ...

Planning is underway in Bulgaria to install two underground pumped storage hydropower facilities with a combined capacity of 1.6 GW. At the same time, Chaira, the largest system of the ...

In June 2024, the 25 MW / 55 MWh utility-scale battery energy storage system (BESS) located in Razlog Municipality, Southwestern Bulgaria commenced commercial operations.

Bulgaria wants to become the energy balancer of the Balkans, with new ambitions to build three new pumped-storage hydroelectric power plants (PSHPs), each with a capacity of 1,000 ...

storage is hindering Bulgaria in the development of an energy storage market. Furthermore, Bulgaria's energy legislation and grid codes have been historically written with thermal plants in mind, ...

In February, state-owned utility and power generation firm NEK announced plans to deploy BESS totalling nearly 300MWh at five of its hydropower sites across Bulgaria.

Transformation of AES Galabovo into a large-scale energy storage facility using proven technology implemented in concentrated solar power plants (CSP) using molten salts

All facilities must be connected to Bulgaria's grid and operational by March 2026. RESTORE is part of Bulgaria's National Recovery and Resilience Plan (NRRP), which supports the ...
