

Can solar power be installed for home use in the UK

Should you install solar panels in your home?

Because of the current social and economic climate in the UK and with sharp rises in the cost of living and energy bills, many members of the public are now seeking to 'take power' back into their own hands. The benefits of installing solar panels in the home have been well-known for over a decade.

Are solar panels affordable in the UK?

The UK offers several solar panel grants and funding programmes to encourage the adoption of renewable energy, making it more accessible and affordable. One of the primary schemes is ECO4 (Energy Company Obligation), which focuses on improving energy efficiency for low-income and vulnerable households.

Are solar panels legal in the UK?

All electrical work in the UK must comply with the national standard, BS 7671. Therefore, it's not just about the legality but also the safety and reliability of your solar panel system. While the Feed-in Tariff (FIT) scheme has concluded for new applicants, those already part of it continue to benefit from the incentive.

How much do solar panels cost in the UK?

The average cost of a 4kWp solar panel system in the UK ranges between £5,000 and £8,000. This cost includes the price of the panels, installation fees, and any additional equipment needed for a robust setup, such as inverters and mounting systems.
