

Why are C&I solar projects growing in Africa?

C&I solar projects continued to play a critical role in driving solar adoption across Africa. In 2024, the rolling pipeline for C&I projects grew by 15 per cent, reflecting sustained demand from businesses seeking cost-effective and reliable energy solutions.

Will large-scale solar projects make a comeback in Africa?

At the same time, large-scale solar projects made a notable comeback, with an 81 GW pipeline under development across the continent. This resurgence is expected to attract substantial foreign investment and contribute significantly to meeting Africa's growing energy demands.

Is Africa transforming its energy landscape by harnessing solar power?

As solar technology continues to evolve and costs decline, Africa's journey toward a brighter, solar-powered future is poised to accelerate, illuminating millions of lives across the continent. Discover how Africa is transforming its energy landscape by harnessing solar power.

Does Africa still have solar power?

While the spread of solar energy across Africa is encouraging, a significant concentration of capacity persists. In 2024, 78 per cent of all new installations were concentrated in just two countries -- South Africa and Egypt.

Discover how Africa is transforming its energy landscape by harnessing solar power. Despite challenges, the continent's growing commitment to solar energy is paving the way for ...

According to the Global Solar Council, Africa could install more than 31.5 gigawatts of solar capacity by 2029. Growth is expected across both distributed and utility-scale segments. Continental ...

UAE's GSU begins work on 50MW solar plant in Central African Republic by Catie Owen | Aug 18, 2025 | Africa, Large Scale Utility Solar, Middle East | 0 comments UAE-based Global South ...

Between 2014 and 2019, utility-scale has been the main driver of solar in Africa, experiencing a strong annual growth and reaching its peak in 2019 with approximately 2.5 GWp of ...

UAE-based Global South Utilities (GSU), a resources investment company, has commenced construction of a 50-megawatt solar photovoltaic (PV) plant in Sakaï, Central African ...

Africa's solar market reached a historic high in 2025, adding 4.5 gigawatts of new capacity in a 54% year-on-year increase, driven mainly by utility-scale projects and led by South Africa, ...

Africa is undergoing what the Global Solar Council describes as a dual energy transition: a state-led expansion of grids and utility-scale projects alongside a rapidly accelerating, privately ...

Gabon launches its first utility-scale solar plant, the Ayémé PV facility. Learn how this 11 MW

Central africa utility-scale solar

project, the largest in Central Africa, will power 300,000 homes.

Two energy transitions, one financing system A central finding of the report is that Africa is effectively running two energy transitions at the same time: a government-led transition, centered on ...

UAE-based Global South Utilities has begun construction on a 50 MW solar project with 10 MWh of battery energy storage systems (BESS) in the Central African Republic.
