

China's wind power generation ranking

In 2023, China's annual power generation from wind power reached 885.9 billion kWh, accounting for 9.4% of the country's total power generation, as the third largest power source in ...

Wind electricity generation, billion kilowatthours, 2022: The average for 2022 based on 189 countries was 11.16 billion kilowatthours. The highest value was in China: 762.67 billion kilowatthours and the ...

Mainland China accounted for six of the top 10 turbine makers worldwide. The top four spots were filled by companies from mainland China alone for the first time since BNEF started ...

Under the guidance of the central government, the PRC has become not only the largest producer of wind power and wind power equipment, but also the world's largest exporter.

China has the largest installed capacity of any nation and continued rapid growth in new wind facilities. With its large land mass and long coastline, China has exceptional wind power resources: Wind power remained China's third-largest source of electricity at the end of 2021, accounting for 7.5% of total power generation.

The countries with the largest market volume for new wind turbines were in 2024: China (86,7 GW), Brazil (5,4 GW), United States (4,2 GW), India (3,4 GW), Australia (3,3 GW), Germany ...

The country added 120 GW of wind and solar power in 2022, 290 GW in 2023, 360 GW in 2024, and 434 GW last year, of which about 119 GW of wind power and 315 GW of solar power, ...

(GEM). The 339 GW of utility-scale solar and wind that have reached the construction stage accounts for one-third of all proposed wind and solar capacity in China, far surpassing the ...

China is the world leader in wind power generation, with the largest installed capacity of any nation [1] and continued rapid growth in new wind facilities. [2]

China is the largest producer of wind power in the world, having generated 466.5 terawatt hours (TWh) of wind power in 2021, more than 29% of the global total of 1,596.4 TWh produced during the year.

China's installed wind power generation capacity has consistently ranked first in the world for an impressive 15-year streak, according to the latest data released by the China Electricity ...
