

# Disadvantages of JA Solar Panels

Are JA Solar panels good?

JA solar panel reviews in the UK have been positive among consumers as well. Examining solar forums, the panels receive quite a lot of praise along with the microinverters that come with them. " [The solar panels] regularly produce at or over their rating almost every day.

Is JA Solar a good brand?

JA Solar is a Chinese brand specializing in solar panels, PV materials and energy storage systems. Their panels are relatively cheap. The prices are comparable to Trina Solar, LONGi Solar and Canadian Solar, making JA Solar panels very very affordable.

What makes JA Solar different from other solar panels?

JA Solar was founded in 2005, although they use much of the same technology as other solar panel manufacturers, but what sets them apart is the JA Solar panels efficiency rating. In this JA Solar panels review, we will dig into the specifics of the different solar panels inside out so that you can decide whether to purchase these panels or not.

Do JA Solar panels lose efficiency?

Solar panel efficiency is reduced by heat. All JA Solar Deep Blue 4.0 panels lose around 0.29% efficiency for each degree the temperature is over 25°C. This means when they're 45°C they'll only produce 94.2% as much power as at 25°C. This small loss isn't bad, but not exceptional for modern, good quality, panels.
