

Wind and solar generated more EU electricity than fossil fuels for the first time in 2025, marking a "major milestone" in the transition to clean power.

The Solar Energy Strategy is part of the EU's RepowerEU plan to phase out Russian fossil fuels and accelerate the green transition in response to Russia's invasion of Ukraine.

The unprecedented EU Solar Strategy aims to provide the right framework to massively deploy solar PV energy in Europe, and sets out new objectives of almost 320 GWac (400 GWdc) by 2025 and almost ...

As part of the REPowerEU plan, in May 2022 the Commission adopted an EU solar energy strategy, which identifies remaining barriers and challenges in the solar energy sector and outlines initiatives ...

Discover the latest solar energy policies in Europe, key incentives, and compliance tips to keep your business ahead in 2025.

In 2019, the EU mandated its Member States to publish and implement 10-year National Energy and Climate Plans (NECPs). Running from 2021 to 2030, NECPs are meant to set out the Member ...

The UK government has unveiled its £15 billion Warm Homes Plan, placing solar panels, batteries and heat pumps at the centre of a significant shift away from insulation-heavy retrofit ...

Originally conceived in the 1960s, space-based solar beaming gigawatt-scale power from geostationary orbit is re-emerging amid falling launch costs. Space-based solar power could provide ...

The strategy raised the EU solar energy target for 2030 to 750 GW DC and laid out measures to accelerate, permitting, boost EU solar manufacturing, power up the solar workforce and ...

As part of the EU's REPowerEU plan, the Solar Energy Strategy puts forward an ambitious target of over 320 GW of newly installed solar photovoltaic capacity by 2025, and almost ...
