

Famous People in Solar Photovoltaic Power Generation

Sheila Bailey, a senior physicist at NASA's Glenn Research Center, has been a leading figure in photovoltaics (PV) for over three decades. Bailey's work has significantly impacted space ...

Our compilation of "25 Renewable Energy Leaders to Follow in 2024" brings you closer to the individuals driving transformative changes in how we generate, consume, and think about energy.

These are the stories of the people behind five sources of renewable electricity, whose inventions and ideas could help power the world towards a zero-carbon future.

Started Solar Photovoltaics Group at UNSW, which made many of the high efficiency Si PV advances described earlier Director of Australian National Energy Agency Centre for Advanced Photovoltaics

Today, we use solar energy to power our homes, our businesses and our streetlights. Heck, we even strapped solar panels onto the rovers that traverse the Martian landscape. In this article, we break ...

The history of solar energy is an American success story. Since the creation of the first silicon solar cell 70 years ago, solar leaders have been innovating, improving efficiency, lowering ...

In 1887, Heinrich Hertz observed the photoelectric effect and the production and reception of electromagnetic waves, also known as the Hertz effect. This led to more research by researchers ...

Discover the pioneers of solar power who shaped the industry, including Becquerel, Einstein, and Telkes. Learn about their contributions to solar energy and the impact they had on the ...

You shouldn't be surprised that there are a lot of big names and companies that are on board with using solar to power their homes and businesses -- and they may just inspire you to ...

Here, we go through 10 solar innovations and share how they could shape the future of the solar industry and energy as a whole. 10. Solar roofing. Starting off more traditional, solar panels ...
