

Fengbaishan Wind Turbine

In July 2023, CTG installed the world's first 16-megawatt offshore wind turbine in Fujian Province, China. The 16 MW wind turbine, the largest single wind turbine in the world, is equipped with a 146-meter ...

Located approximately 35 kilometers from the shoreline of Pingtan county, the 16-megawatt offshore wind turbine is currently the largest single capacity wind turbine that has been ...

East China's Fujian Province is now home to the world's largest 26-megawatt offshore wind turbine. Its hub center is 185 meters high, equivalent to a 63-story building. With an average wind speed of 10 meters per second, a single unit can generate 100 million kilowatt-hours ...

The wind farm consists of 11 offshore wind turbine units, including the world's largest 16-megawatt offshore wind turbine unit. The wind turbine will generate around 360 million kilowatt-hours ...

China's floating offshore wind prototypes The global deep-sea floating offshore wind is still in the pilot demonstration stage. By the end of Sept. 2024, 5 semi-submersible wind turbines have been ...

Yunnan Xishan Fengbaishan wind farm is an operating wind farm in Xishan District, Kunming, Yunnan, China.

Once operational, it will become the largest single-unit capacity offshore wind turbine in the world, capable of generating over 66 million kilowatt-hours of green electricity annually, which...

The turbine is a testament to China's rapid progress in offshore wind technology, representing the most powerful wind turbine globally.

Located about 35 kilometers offshore from Pingtan of Fujian province, the wind farm consists of 11 offshore wind turbine units, including the world's largest 16-megawatt offshore wind turbine unit.

The world's first 16-megawatt offshore wind turbine off the coast of Fujian Province was successfully connected to the grid and began generating electricity on Wednesday. The wind turbine ...
