

How to thread the battery cabinet

Important Safety Instructions -- SAVE THESE INSTRUCTIONS. Read these instructions carefully and look at the equipment to become familiar with it before trying to install, operate, service or maintain it.

The BC16 battery cabinet is equipped with four casters, two swivel types in front and two rigid types in the back. Move the cabinet into the desired location and lock the front casters.

Draw a wiring schematic representing the cables connected between the battery cabinet's output terminal blocks and any external disconnect device, junction box and/or load/rectifier.

Battery cabinets that are not supplied with an incorporated DC output disconnect device must have an appropriate disconnect device provided external to the cabinet.

Installation or replacement of batteries must be located in a SERVICE ACCESS AREA: The service manual shall include the following instructions for battery replacement and disposal:

It covers every detail, including the installation of removable casters, heavy-duty bus bars, and other complex steps, ensuring clarity and ease of understanding.

Step 3: Measure from Top Line to Top of Battery Cabinet Bracket NOTE: All three brackets will be at different heights upon completion.

Connect the power system's battery cable terminated in an Anderson connector to the first battery cabinet's battery cable terminated in a mating Anderson connector.
