

# How to use bess in jakarta outdoor communication power supply

What is Bess & how does it work?

BESS can store energy from renewable sources like solar and wind, or from the grid, and discharge it when needed to maintain a fixed output power. This helps in balancing supply and demand, especially during peak usage times.

Why should you use Bess for fixed output power?

Using BESS for fixed output power can enhance energy reliability, reduce operational costs, and support the integration of renewable energy sources. It also helps in reducing carbon emissions by optimizing the use of renewable energy. Non-utility Application: EV Charging Station / Battery Swap Station 20 xx / xx kV MV e-mC-N

What are the key steps for successful Bess integration in Indonesia?
