

Indian military uses solar power

Will Indian Army install solar energy plant at Narengi military station?

As part of the effort, the Indian army has installed a solar energy plant. It has a capacity of 1 MW (Mega Watt) at the Narengi military station to provide clean energy to the army. The army official said, the plan is to extend the solar energy plant up to 3 MW capacity.

Why is India launching a green energy plant in Sikkim?

The move aims to reduce complex logistics, dependence on fossil fuels and to accelerate decarbonization. Indian Army has also inaugurated the first green solar energy plant in Sikkim. It uses vanadium-based battery technology, was built at an altitude of 16000 ft. in the northern part of the state and has a capacity of 56 KVA.

Why is solar energy important in Ladakh?

Given Ladakh's high solar irradiance and low temperatures, this project will facilitate the production and utilization of green energy, eliminating reliance on fuel logistics and enhancing self-sufficiency in remote areas affected by road connectivity disruptions.

State-owned power generator NTPC is partnering with the Indian army to build an off-grid solar-hydrogen-battery microgrid to ensure year-round 24/7 clean electricity at a military facility in the ...

NTPC has signed a long-term power purchase agreement (PPA) with the Indian Army to supply 200 kilowatts (kW) of round-the-clock renewable energy from its solar-hydrogen-based ...

As part of the effort, the Indian army has installed a solar energy plant. It has a capacity of 1 MW (Mega Watt) at the Narengi military station to provide clean energy to the army.

State-owned power generator NTPC is partnering with the ...

This level of energy security is crucial for maintaining critical military operations without compromise. The Army, in collaboration with Military Engineer Services (MES), has commissioned a ...

The Indian Army has successfully commissioned a 10 kW solar power plant in Muguthang village in North Sikkim, bringing round-the-year electricity to one of India's highest and most remote ...

New Delhi, 24th October 2024 - NTPC has partnered with the Indian Army to establish a Solar Hydrogen-based Microgrid at Chushul, Ladakh. This significant step will provide a stable power ...

Learn more about the Indian Army commissions solar-powered spy drones developed by Bengaluru start-up NRT under the iDEX initiative.
