

Install solar roof tiles

How do I install solar panels on a lightweight tile roof?

The best way to install solar panels on a lightweight tile roof is through a method called inset solar installation, also known as a "comp-out" installation. This technique removes the section of tile where the solar panels will be installed and replaces it with composite shingles before mounting the solar array.

How do you install solar panels on a new roof?

Mounting the solar panels - Once the new roof section is complete, a solar expert installs the racking system and solar panels securely onto the composite shingles. Unlike tile, these shingles can handle the weight and pressure of solar mounting without breaking.

Can you put solar panels on a tile roof?

Unlike a standard shingle or metal roof, a tile roof is a system of interlocking, brittle pieces. You can't just drill through them. Any attempt to mount a solar panel directly onto the tiles will almost certainly lead to cracking, which compromises the roof's primary function: keeping water out. This is the central challenge.

Can solar panels be installed on lightweight tiles?

If installers attempt to mount solar panels directly onto lightweight tiles, several issues can arise: Tile breakage: Walking on or drilling through these tiles can cause cracks or breaks, which may lead to roof leaks and structural damage.
