

# Jinliwang multifunctional solar power generation

In this work, we propose a novel photovoltaic-thermal hybrid system coupling of semi-transparent solar cells and multistage interfacial desalination that can simultaneously produce ...

Jinli Wang, Shandong Heze, professor level engineer, graduated from the China Electric Power Research Institute in 2006 with a master's degree. Her main research directions are smart grid, ...

We have developed TA@APTES@Fe<sup>3+</sup> composite coating with multifunctional performance via a facile and flexible method, with demonstrated promise in the application of solar ...

This topic is fundamentally different from the traditional solar tracking device such as clock and the maximum power solar tracking device, such as passive solar tracking device. Combined with ...

Characteristics of the solar home light: Solar power generation has realized the vision of clean and environmental protection. The system can be used for home lighting and outdoor lighting.

In December of the same year, a full range of integrated solar lights power from 5W to 120W has developed and been sales. Meanwhile, in line with market and customer demands, the stable and ...

The Sinopec station is China's first multifunctional fueling station to integrate gas, CNG, hydrogen, and electric charging with photovoltaic power generation. The distributed photovoltaic ...

To provide a useful reference for further studies of solar hybrid power systems, a comprehensive review of multi-energy hybrid power systems based on solar energy is presented in ...

30A Multifunctional Solar Controller 12V/24V Photovoltaic System Power Generation LCD intelligent safety protections
