

Kenya's largest energy storage project

KenGen has commissioned its first Battery Energy Storage System (BESS) in Nairobi to power its modular data center, ensuring uninterrupted renewable energy supply.

KenGen's recent launch of a 1.16 MWh Battery Energy Storage System (BESS) in Nairobi came with all the typical trimmings of a milestone event.

The Kenya Electricity Generating Company is piloting use of a Battery Energy Storage System for uninterrupted renewable power, marking a new frontier in Kenya's green energy strategy.

Located near Kamburu Dam in Embu County, approximately 150 km northeast of Nairobi, the Seven Forks solar-plus-storage project will not only inject clean energy into the national grid but ...

The Kenya Electricity Generating Company PLC (KenGen) has announced plans to implement a Battery Energy Storage System (BESS) as ...

KenGen is honoured to lead the implementation of the Battery Energy Storage System (BESS) project under the GREEN program. This initiative marks a significant milestone for Kenya's ...

The Kenya Electricity Generating Company (KenGen) has unveiled its first Battery Energy Storage System (BESS) at its Nairobi headquarters, a move aimed at powering its modular data ...

Kenya Electricity Generating Company (KenGen) has been selected to carry out a battery storage pilot project, through a programme to increase electricity access funded by the World ...

Meta Description: Discover how Nairobi's largest battery energy storage project transforms Kenya's renewable energy landscape. Explore its capacity, environmental impact, and role in grid stability - ...

The BESS project will reduce the impact of intermittency on the grid and store power for use during peak hours. KenGen is working with the World Bank to fast-track implementation of the ...
