

# Large-scale energy storage batteries in Australia

Finnish energy giant Vattenfall has announced the latest addition to its massive network utility-scale battery energy storage system (BESS) projects in Australia: a record-breaking 1.5 GWh...

Australia is now the third-largest market worldwide for large-scale battery energy storage by capacity with 14 GW/37 GWh of battery energy storage capacity at or nearing financial...

The first quarter (Q1) of 2025 has seen a surge in investment for large-scale battery storage in Australia, with six projects worth a total of A\$2.4bn (\$1.5bn) reaching the financial ...

The New South Wales government has awarded contracts to six new large-scale battery energy storage (BESS) projects, including what will become the largest battery in Australia to date. ...

In 2025, Australia surpassed the United Kingdom to become the third-largest market for utility-scale battery energy storage systems (BESS) globally, behind China and the United States.

This Big Battery Storage Map of Australia includes all big battery projects of 10MW or 10MWh and above. "Operating" includes those projects currently.

The first quarter of 2025 was the second best on record for investment in large-scale Battery Energy Storage Systems (BESS) in Australia, with six projects worth \$2.4 billion in total ...

Australia has a massive pipeline of grid-scale battery energy storage projects. 16.5 GW of new battery projects could arrive in the NEM in the next 3 years.

Australia is leading the global battery storage boom with AUD 2.4B invested in Q1 2025. Discover how big batteries are replacing coal, stabilizing the grid, and driving the nation's clean ...

Investment in large-scale battery storage is on the rise. The projects store up renewable energy generated during the day that can be used during peak periods. What's next? A researcher ...
