Here are 10 things to consider when upgrading your existing station or planning a new one: 1. Provide spaces to promote rest with individual dorms, safe sleep room. Traditionally, stations ...

This document provides standard design criteria for fire stations, including requirements for different sized stations housing one, two, or three fire companies.

Provide Spaces to Promote Rest with Individual Dorms, Safe Sleep Room
Look For Energy Efficiency When Choosing Appliances
Carve Out Specific Spaces For Specific Uses
Reconsider Your Alarms and Lighting, Especially at Night
Make Physical Fitness A Priority
Plan Ahead For Your Power Needs
Design Ambulance Bay Doors For Safety and Speed
Ventilate The Ambulance Bay
Build in Disinfection Capabilities
Provide Secure Drug Storage & Inventory Management
Traditionally, stations have had communal dormitories where everyone sleeps. Given different sleep schedules and habits - and snoring - those days are gone, and individual rooms are a must, says Rodriguez. This allows each crew member more control over their environment for better sleep. "One of the things that oftentimes happens is the wa...
