

BMS technology at Lithium Balance is not only designed to provide battery monitoring and safe use, but to make the most out of each battery pack in terms of performance and longevity, providing the ...

The LMU monitors individual and total voltages of 3-8 cells in series and features 2 temperature sensors. The s-BMS can be configured through the licensed s-BMS PRO software, which enables the battery ...

A Battery Management System (BMS) is an intelligent component of a battery pack responsible for advanced monitoring and management. It is the brain behind the battery and plays a critical role in its ...

Application areas of battery management systems for the automotive industry with specific case studies from LiTHIUM BALANCE.

For a comprehensive introduction about the possibilities of our c-BMS, Li-ION technology, and battery integration, LiTHIUM BALANCE offers trainings tailored specifically to your needs.

A Battery Management System (BMS) is a system that monitors and manages a lithium-ion battery pack. It ensures the safe and efficient operation of the battery by balancing its cells, ...

Learn how to safely charge lithium batteries, the 80% rule for LiPo longevity, and how to reset a BMS. Discover why using the wrong charger is dangerous and how to prevent thermal runaway.

A Battery Management System (BMS) safeguards lithium-ion batteries by monitoring voltage, current, and temperature, preventing overcharge, discharge, and thermal runaway.

Compact battery management system (BMS) and designed with ISO 26262 pre-certified key components, such as main processor, ASIC, and power supply.

A Battery Management System (BMS) is the brain and safety layer of any lithium battery pack. It monitors cells, protects against abuse, balances ...

Overview of our products and solutions from LiTHIUM BALANCE. Learn more about our Battery Management Systems (BMS) & our Battery Protection Units (BPU).

Integrated Battery Management System with parallel pack support, hot-swap functionality, and advanced software algorithms.

The n3-BMS(TM) is tailored for high voltage and power applications, supporting up to 1000V and 2000A,

Lithium Battery BMS

making it especially suitable for trucks, buses, and other high voltage applications.
