

Lithium battery energy storage market share ranking

LFP batteries are projected to experience the highest CAGR due to their better safety, longer cycle life, and lower cost, making them more appealing for electric vehicles and large-scale energy storage.

Recently, authoritative institutions such as InfoLink, SMM and ICC released the 2025 global energy storage shipment rankings. HiTHIUM demonstrated strong performance, securing a ...

The top five largest energy storage cell manufacturers in the first half are CATL, EVE Energy, REPT, Hithium, and BYD. CATL secured the top position with orders from major customers ...

This report provides a comprehensive view of the global market for Lithium-Ion Battery for Energy Storage, covering total sales volume, sales revenue, pricing, the market share and ranking of key ...

On-grid segment held the dominant market share in the year 2024. On-grid lithium-ion battery systems help store excess solar/wind power and release it during peak demand, ensuring ...

In 2024, Lithium-ion held a dominant market position, capturing more than a 62.10% share of the global battery energy storage system (BESS) market.

By battery type, lithium-ion commanded 88.05% of the battery energy storage system market share in 2025, while Lithium Iron Phosphate (LFP) is projected to expand at a 18.62% CAGR ...

Lithium-ion batteries are expected to retain the largest market share in BESS due to their superior energy density, high round-trip efficiency, and declining cost trajectory.

Asia Pacific dominated the battery energy storage market with a share of 34.29% in 2025. Battery energy storage or BESS is a modern energy storage solution that stores energy using ...

The lithium-ion battery market is expanding due to the rapid adoption of electric vehicles, renewable energy storage, and portable electronic devices. These batteries offer high energy ...
