

Long-lasting inverter cabinet for drilling sites

DIY-Friendly and Effortless Installation: The freestanding design of the BOSSBOX eliminates the need for complex drilling or wall-mounting, significantly reducing installation time and labor.

The 350kWh All-in-one C& I Energy Storage Cabinet features a highly integrated design with built-in BMS, EMS, and PCS. Supporting off-grid and grid use, it cuts energy costs, boosts efficiency, and ...

Built with durable materials, the cabinet ensures long-lasting performance and reliable power delivery. As industries adopt more sophisticated energy solutions, inverter control cabinets from ...

By seamlessly integrating leading brands hybrid inverters into the IP55-protected battery cabinet, a compact, easy-to-install, and high-performance turnkey energy storage system is achieved. This ...

Provide secure housing for inverters, battery management systems, and power distribution components. Ensure long-term durability for outdoor and remote installations.

Fully seam-welded or knock-down/flat pack styles Custom battery racks, either fully welded or bolt-up Integrated thermal management as standard, including exhaust fans Custom backplates to ...

This energy storage cabinet boasts an advanced All-in-One integrated technology, seamlessly combining PCs, inverters, Battery Management System (BMS), and Energy Management System ...

Inverter cabinets are built using high-strength materials such as cold-rolled steel, stainless steel, or reinforced composite polymers to withstand mechanical stress, corrosion, and long-term wear.

Meticulously designed to deliver unparalleled reliability, efficiency, and high performance, our cabinets cater to diverse industries such as microgrids, renewable energy, and energy storage. Experience ...
