

Manila Energy Storage Equipment Renovation Project

MANILA, Philippines -- Energy storage is stepping into the spotlight of the country's green transition, with more companies making bold investments to unlock its game-changing potential.

On October 10, 2025, HyperStrong officially launched its office in the BGC financial district of Manila, and successfully signed a 185MWh large-scale energy storage system project serving the local ...

The country's first hybrid solar PV and battery plant (pictured) was commissioned earlier this year. Image: ACEN. An infrastructure group owned by billionaire Enrique K Razon has proposed ...

Ingrid Power Holdings Inc. plans to put up a 150-megawatt battery energy storage system in Barangay Malaya, Pililla, Rizal with estimated construction cost of P6.875 billion.

As Manila accelerates its shift toward renewable energy, the Manila Wind Power Project faces a critical challenge: how to store excess energy efficiently. Wind power, while abundant in coastal regions like ...

The project, which is strategically located on the Philippines' main island of Luzon, about 100km from Manila, will combine 3.5GWp of solar PV capacity with 4.5GWh of battery energy ...

The passage of Republic Act No. 11234, entitled "Energy Virtual One-Stop Shop (EVOSS) Act" on 08 March 2019 paved the way for streamlining and expediting the permitting ...

It is our goal to integrate battery energy storage systems in our renewable energy projects such as solar and wind. By storing excess energy generated during peak production times, these systems help ...

The project will be one of the first large-scale energy storage systems in Central Visayas and is expected to help improve the reliability of the power supply amid rising demand from ...

Explore the Philippines' new solar project featuring cutting-edge battery storage systems, aimed at boosting renewable energy capacity and sustainability.
