

Paramaribo microgrid development

We specialize in solar energy storage solutions, energy storage battery systems, microgrid development, and photovoltaic power generation projects. RISHA Solutions - Imagine a tropical nation where wind turbines ...

Suriname is advancing its renewable energy goals by developing a 30 MWp solar park in Degrad des Cannes, Paramaribo. The project aims to reduce the country's reliance on fossil fuels, improve energy ...

Twelve remote villages in the Suriname forest now have access to uninterrupted power thanks to a new microgrid. The microgrid is the first to be handed over as part of the second phase of the Suriname ...

These microgrids will provide reliable, clean, and sustainable electricity to 1,906 residents in 10 rural communities of the Cajana and Galibi regions. The completion of this project will mark a significant ...

In May 2020, the first rural microgrid photovoltaic project was officially put into operation, which solved the electricity problem in nearby villages. In October 2021, the second phase of the project was ...

Residents of 10 rural communities in Suriname are expected to benefit from a multi-million US dollar electrification project funded by the Barbados-based Caribbean Community (CARICOM) Development...

These micro grids will provide reliable, clean, and sustainable electricity to 1,906 residents in 10 rural communities of the Cajana and Galibi regions; and the completion of this project will mark a significant ...

The project aims to increase the transmission capacity, and enhance the stability and reliability of electricity service supply through expanding the electricity transmission and distribution network in ...

The microgrid project in Suriname is a pioneering initiative, integrating solar PV, energy storage, and diesel generation technologies to provide off-grid electricity solutions.
