

Photovoltaic energy storage project in Mexico

The state-owned utility is driving more than 1,500 MW of new clean generation and energy storage capacity nationwide. The expansion of the Puerto Peñasco photovoltaic complex is ...

Our projects primarily involve grid-connected systems with the Federal Electricity Commission (CFE), as well as battery storage solutions and DC-to-AC conversions for areas without ...

Recently, the Mexican Ministry of Energy announced a new regulation mandating that all newly built wind and solar PV projects must be equipped with energy storage systems accounting for ...

Energy minister Luz Elena González announced the winning projects last week, and each solar and wind project is to be co-located with a battery energy storage system (BESS).

Thanks to the country's geographical conditions, Mexico has great potential for solar and wind energy, which makes it an ideal candidate for the implementation of energy storage systems to ...

By combining specific regulations, a storage mandate for new renewable projects, and long-term planning, Mexico is emerging - according to OLADE - as a regional benchmark for energy ...

In October, Spanish energy company Iberdrola announced plans to move ahead with two solar projects totaling 535 MW in Mexico, marking a renewed commitment to the country's energy ...

Mexico is seeing a surge of large-scale solar and battery storage proposals across multiple states following an October decree that sets clearer rules for private energy investments.

Mexico is experiencing a rapid acceleration in large-scale solar and energy-storage proposals, following the government's rollout of a new decree in mid-October that more tightly ...

Mexico can unlock the full potential of energy storage solutions by fostering greater integration of renewable energy, supporting grid stability, and improving regulations related to battery storage.
