

Photovoltaic panel planting policy

This guide, produced by the Interstate Renewable Energy Council, Inc. (IREC), introduces the issues surrounding policy and technical considerations of grid-integrated renewable energy.

The continued growth of the distributed solar market has prompted electric utilities, regulators, and others to consider improvements to the interconnection processes. Below are resources to help you ...

Advice in this document is focused towards solar sites and native plant management that are installed on previously degraded lands such as former agricultural fields or fallow fields that are suitable for a solar array ...

It is advisable to consult code and solar energy professionals when planning a project to avoid issues that may impact the future installation of a renewable energy system.

Solar panel farm projects completed on slopes exceeding 15% can be permitted, however they would be pushing the threshold of current constructability, especially if any substantial earth disturbance is proposed.

Under the new legislation, all solar energy systems must comply with updated solar installation standards that emphasize safety, efficiency, and grid compatibility.

Intentional use of targeted plant species will enhance the positive impacts of a solar array for pollinators. When pollinator habitat is a primary goal, planning for these goals in the pre-construction phase ...

At the federal level, there are several key policies, programs, and regulations that impact the development of solar PV and other renewable energy projects, influencing project procurement options, ...

Research from the National Renewable Energy Laboratory shows that the entire U.S. could be powered by utility-scale solar occupying just 0.6% of the nation's land mass. A utility-scale solar power plant may ...

Solar panels can significantly affect ecohydrology by redistributing moisture from precipitation and casting a significant amount of shade. Account for potential threats from noxious and invasive species, prioritize the ...
