

Solar Panel Water Drain Clips is installed on the frame of the solar panel to drain accumulated water and dust from the panel, thereby extending the service life and power generation of the solar panel.

The water saving capacity demonstrated by PV panels has great potential, especially in arid and semi-arid areas, where the panels can reduce water loss and enhance soil moisture.

Say goodbye to "water damage!" Learn how solar panel water drain clips work, benefits and installation tips for enhanced performance & longevity.

The Photovoltaic Stormwater Management Research and Testing (PV-SMaRT) project is developing and disseminating research-based, PV-specific tools and best practices for stormwater ...

?Automatic Water Removal?The solar panel drainage clips are designed to automatically remove accumulated water, ensuring efficient power generation and extending the ...

Results showed that runoff volume, peak flow discharge rate and overland flow velocity are not remarkably impacted by the presence of PV panels. However, further investigations are ...

?Automatic Water Removal?: These PV solar panel water guide clips are specifically designed to efficiently drain accumulated water from your solar panels, helping to maintain optimal ...

Learn how the water drainage clips for solar PV panel frame work to improve drainage, prevent corrosion, and extend solar panel lifespan

The solar panel water drain clips can guide the water flow to discharge faster and more smoothly, thereby reducing the deposition of dirt and maintaining the cleanliness of the PV...

Jahanfar et al. (2019) conducted a long-term study comparing the discharge between the green roofs with or without PV panels, and the results indicated that the PV panels increased the ...
