Data and information about power plants and their location across the globe, plotted on an Interactive world map

Most are individual photovoltaic power stations, but some are groups of co-located plants owned by different independent power producers and with separate transformer connections to the grid.

Welcome to the Global Solar Atlas. Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for ...

To address these issues, this study proposed a novel enhanced PV index (EPVI) for mapping PV power stations across China, and the mapping results were further applied for the ...

The Global Energy and Renewables Map is an interactive web map where you can explore global power plants and U.S. solar and wind projects.

We show the location of the projects from our extensive database in the form of place markers on a world map. We used the resources of Google Maps to give access to user-friendly facilities for ...
