

Photovoltaic power supply in the New Third Board

When Hairun Photovoltaic applied for listing on China's New Third Board in 2024, industry watchers immediately recognized this as more than routine corporate maneuvering.

Such type of systems helps in minimizing the PV panel surface temperature, reduce the water evaporation, enhance the panel life, and increase the power production.

New research from Morocco has found that the Sandia PV Array Performance Model is the most suitable for measuring AC power in PV systems located in arid-climate ...

The Magdalena II solar power plant was built using double-sided photovoltaic modules and unique SF7 solar trackers, which are mounted at a significant height. Thanks to innovative technologies, ...

With renewable energy demand surging 18% annually in Asia-Pacific markets, companies like EK SOLAR are leveraging this platform to expand production capacity and optimize supply chains. Let's ...

As of Q2 2024, over 35% of photovoltaic (PV) companies listed on China's New Third Board (NEEQ) have reported declining revenues - the worst performance since 2018's "531 New Deal" policy shift .

BNEF reports 23 PV companies joined the Third Board in 2023 alone, raising a collective 4.2 billion RMB. That's enough to build 3 GW of new production capacity - equivalent to powering 900,000 ...

The next-generation applications of perovskite-based solar cells include tandem PV cells, space applications, PV-integrated energy storage systems, PV cell-driven catalysis ...
