

Photovoltaic support package contract

Do solar projects need an EPC contract?

In our experience, most utility-scale solar projects use an EPC Contract. An operation and maintenance agreement: This is usually a medium- to long-term Operating and Maintenance Agreement (O&M Agreement) with an Operator. The term of the O&M Agreement will vary from project to project.

What should a solar panel contract include?

Your solar panels' contract should estimate how much energy will be produced and what savings the client can expect. This section of the agreement should clearly outline how the system's performance will be monitored and what guarantees are given. Solar power has many benefits for businesses and commercial properties, such as

What is a solar development agreement?

A solar development agreement is a legally binding contract between parties that outlines the terms and conditions for the development and operation of a solar energy project. Service contracts are an agreement between two parties, usually the home or business owner, and the provider, an installation or maintenance company.
