

# Similar solar power generation in Canada

Wind and solar photovoltaic energy are the fastest growing sources of electricity in Canada, while biofuels and electric vehicles also play an important role in reducing the climate impact of transportation.

Find out where your province and city are ranked in terms of solar energy potential. With charts and maps you will easily be able to make comparisons across Canada.

NextEra Energy facilities generate renewable energy for residential, commercial and industrial customers through its green solutions. The company, through integrated solutions like solar ...

Over the past decade, other renewable technologies--particularly wind and solar--have also seen steady growth, further diversifying the country's clean electricity mix.

General Fusion is developing utility-scale fusion power using a new, patent pending concept based on recent developments in Magnetized Target Fusion (MTF). It is the goal of General ...

This web mapping application gives estimates of photovoltaic potential (in kWh/kWp) and of the mean daily global insolation (in MJ/m<sup>2</sup> and in kWh/m<sup>2</sup>) for any location in Canada on a 60 arc seconds ~2 ...

Using the example "to obtain similar to or similarly to," the latter sounds very strange even though similarly is definitely being used as an adverb. The sentence: "The fragments were obtained ...

The difference is a bit subtle. "The microbial activity level was similar in A and B" means the same behavior was observed in two distinct cases, perhaps without A and B being aware of each ...

With the introduction of a Feed-in tariff (FIT) in 2009, Ontario became a global leader for solar energy projects. The program was the first of its kind in North America. Thanks to the FIT program, Ontario was the home of what was temporarily the largest solar farm in the world (in October 2010) until surpassed by larger farms in China and India. Located in Sarnia, Ontario, the 97 megawatt Sarnia Photovoltaic Power Plant can power more than 12,000 homes. Ontario has several other large PV power plants, oth...

The evolution of solar storage solutions has revolutionized renewable energy adoption across Canada. Advanced lithium-ion batteries, coupled with smart energy management systems, ...

And, while Canada isn't that big on solar energy right now, the authorities and global investors are doing their fair share to get it there. So, if you live in Ontario or Alberta and have been ...

NextEra Energy facilities generate renewable energy for ...

# Similar solar power generation in Canada

For me, rephrasing to "A is constructed in a way similar to B (B's way of construction)" makes it clearer that the second statement is correct.

Recent research has shown that installing solar panels on just 1% of Canada's agricultural land could generate between a quarter and over a third of the country's total electricity needs.

I'm attempting to document a change that will make two things more congruent. I'd like to use a word in this way: This change [makes similar] the two items. The best I've been able to find by searching is ...

Similar to spaghetti, linguini noodles are long and thin and adaptable to a variety of dishes. Now, try interchanging "similarly" and "similar to" in the examples.
