

Austria's photovoltaic (PV) boom is gaining momentum. Nearly 500 MW of PV came online in Q1 of 2024 according to Austria's electricity regulator eControl, a 77% increase over the ...

More than 2 GW of solar was installed in Austria in 2023, according to Austrian PV analyst Hubert Fechner.

The nation has set an ambitious goal of sourcing 100% of its electricity from renewables by 2030, and solar power is set to play a pivotal role in meeting this target. These changes to ...

Apr 2, 2012&#0183; Solar power in Austria contributes 8.82 TWh of generation to the Austrian grid, accounting for 11.2% of total electric power generation as of 2024, with 8.48 GW of installed capacity.

In 2024, Austria achieved another year of record photovoltaic (PV) deployment, adding 2.51 GW of new capacity and bringing cumulative installations to 9.4 GW (DC). PV generation reached approximately ...

Sonja Wogrin: Austria's electricity consumption will rise sharply by 2040 and may almost double. Depending on the electricity demand in 2030 and available demand-side flexibilities and ...

Despite the remarkable achievements in the past two years, Austria has only installed 30% of the necessary photovoltaic power to achieve 100% renewable power supply by 2030 (21 GW).

Renewable energies are the economic engine of the future worldwide. Here you can find selected data on Austria's renewable energy sector.

Austria aims to achieve a 100% renewable electricity production by 2030 with 1,000,000 homes having solar panels fitted by that date. 11 TWh of extra photovoltaics will be needed above 2021 levels.

Solar PV accounted for 19% of Austria's total installed power generation capacity and 8% of total power generation in 2023.
