

China's massive 30-megawatt (MW) flywheel energy storage plant, the Dinglun power station, is now connected to the grid, making it the largest operational flywheel energy storage facility ever built.

Several installers agree that China could potentially use this method to disrupt our electricity grid some time in the future and in this way exert pressure on Belgium.

Global battery cell oversupply driven largely by China and is set to continue China lithium-ion battery cell production capacity overlaid by global lithium-ion battery demand

Strategic Positioning of Key Players GIGA Storage Belgium: GIGA Storage is constructing the Green Turtle battery park in Dilsen-Stokkem, a 700 MW / 2,800 MWh installation. Strategically located ...

Chinese-manufactured solar photovoltaic (PV) panels are piling up in European warehouses, with Rystad Energy forecasting 100 GWdc of solar capacity in storage by the end of 2023.

However, despite the renewable energy boom, China's power system still struggles to absorb all of the generation, making energy storage - which bridges temporal and geographical gaps ...

BRUSSELS, Belgium (28 January 2026): The EU installed 27.1 GWh of new battery storage capacity in 2025, a new record year powered by strong utility scale deployment, according to SolarPower ...

Blockchain Balancing Acts: Pilot projects in Belgium and Guangdong use smart contracts to automatically trade stored solar power across borders. No humans, no delays--just electrons and ...

In February 2025, China shelved a requirement that new domestic wind and solar projects be bundled with energy storage. The change meant that China's storage providers could no longer ...

China and European solar and storage leaders met in Düseldorf, Germany, this week to call for deeper cross-border cooperation as both regions confront record PV additions, rising storage...

Solar power storage in China in Belgium
