

South Sudan Solar Energy Construction Site

We focus on increasing the efficiency and accessibility of solar, hydro, and wind technologies to reduce carbon emissions and reliance on fossil fuels. By harnessing solar power, we aim to provide clean ...

The 20 MW solar plant, combined with a 14 MWh Battery Energy Storage System (BESS), is expected to increase energy access, stabilize the grid, and reduce electricity costs.

South Sudan is planning to build a 500 MW solar power plant in agreement with the United Arab Emirates. It also plans to invest in the 1,080 MW Grand Fula hydropower project. At the ...

Ezra Construction & Development Group remains dedicated to discovering cleaner and more cost-efficient power alternatives. The Group continues to work towards reducing energy costs ...

Spearheaded by Ezra Construction and Development Group Ltd., this project not only marks a pivotal moment in South Sudan's energy landscape but also represents the country's ...

A public-private partnership in South Sudan has launched the country's first major solar power plant and Battery Energy Storage System (BESS) in the capital Juba, where it is expected to ...

Ezra Group, a South Sudan family-run conglomerate, on Monday announced the launch of a 20-MW solar power plant with a 14-MWh battery energy storage system in South Sudan, ...

South Sudan has taken a transformative step toward sustainable energy by launching its first solar power plant. Built by Egypt's Elsewedy Electric, the 20-megawatt power plant is located in ...

With a strong focus on sustainability and cost reduction, Ezra Group aims to accelerate South Sudan's transition to a greener and more energy-secure future. This project marks a ...

There are plans to build new generation stations and to import electricity from neighboring Ethiopia, Sudan and Uganda, but the civil war has hindered progress in that direction.
