

# State Grid Photovoltaic Panel Data Analysis Report

Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U.S. utility-scale solar sector.

Solar accounted for 58% of all new electricity-generating capacity added to the US grid through the third quarter of 2025, with more than 30 GW installed. Solar and storage, combined, ...

Browse or search this comprehensive listing of data and tools for analyzing photovoltaic (PV) and concentrating solar power (CSP) technologies, solar grid and systems integration, and ...

You can explore SEIA's Solar Means Business report, view additional data and read market sentiment analysis of the corporate solar space.

Photovoltaics is a fast-growing market: The Compound Annual Growth Rate (CAGR) of cumulative PV installations was about 27% between the years 2014 and 2024. Wafer size increased. Keeping the ...

Given the high deployment targets for solar photovoltaics (PV) to meet U.S. decarbonization goals, and the limited carbon budget remaining to limit global temperature rise, accurate accounting of PV ...

o EIA reports that at the end of 2024, 69% of U.S. installed PV capacity was from utility -scale PV systems. o Despite representing only 21% of installed U.S. PV capacity at the end of 2024, ...

It includes corresponding PV facility information, including panel type, site type, and initial year of operation.

This work includes technoeconomic analysis of photovoltaic (PV) and concentrating solar-thermal power (CSP) technologies; analysis of electricity markets, solar access, and environmental impact; and ...
