

# Tcl photovoltaic panel special-shaped extended pressure plate

This manual provides safety and installation instructions for IEC certified TCL photovoltaic modules carrying the T&#220;V Rheinland test mark on the product label (Figure 1).

Firstly, each solar panel should be wrapped individually. The use of a cushioning material such as bubble wrap or foam can provide a protective layer against accidental knocks or bumps.

Ideal for residential, commercial, and utility applications. The multi-specification version adapts to different application scenarios and the differentiated needs of different customer groups.

The document provides detailed specifications for various high-efficiency photovoltaic (PV) modules developed by TCL, including TOPCon Bifacial, Shingled Bifacial, and PERC Bifacial technologies.

The photovoltaic edge pressure is a pivotal component designed to securely fix and support the edges of photovoltaic panels, essential during both the manufacturing and installation phases of photovoltaic ...

TCL Solar is a global leader in N-Type TOPCon and Back Contact solar technology. Discover high-performance, durable solutions for your home, business, and large-scale energy projects.

Access datasheets, installation manuals, warranties, and certifications in the TCL Solar Resource Centre, designed for professionals using TOPCon, IBC, and BC panels.

Unlike standard components, these specially engineered plates distribute mechanical stress evenly across mounting structures - a vital feature for solar projects in extreme weather conditions.

**MADE FOR REAL WEATHER** &#183; strong frame and cell connection design helps to protect the panels against weather challenges like temperature swings, snow loads, and hail.
