

Thailand's new energy storage vehicle

This hybrid vessel uses seawater-cooled batteries, achieving 40% lower energy costs than diesel ferries. After 18 months of operation, it's proving that energy storage vehicles in Thailand can be both ...

The standard covers safety requirements with respect to the Rechargeable Electrical Energy Storage System (REESS) of vehicles of categories M and N, equipped with one or more ...

A public-private network was recently launched to promote cooperation to develop technology for the making of standardised swappable batteries for small electric vehicles (EVs). This ...

In 2023, Sunwoda's SEVB brand ranked first in hybrid electric vehicle (HEV) battery sales and third in high-end EV battery sales in China. The upcoming Thai factory will be Sunwoda's ...

The GMEV 2025, a new energy electric vehicle and charging pile exhibition in Thailand, will set up a "super charging zone" to showcase 480kW super charging piles, integrated photovoltaic ...

Thailand's 2024 plan increases renewable energy, highlighting crucial battery storage systems for buildings and power generation.

Executives from TMC, TMA, and SCG, in collaboration with partner companies, celebrate the launch of the Battery Energy Storage System (BESS) demonstration in Thailand. As the global ...

Thailand's 30@30 EV Vision aims to achieve 30% of total vehicle production as zero-emission vehicles (ZEVs) by 2030. The adoption rate of battery electric vehicles (BEVs) has risen dramatically, driven ...

Thailand may lack the Battery Energy Storage Systems (BESS) necessary to navigate supply and demand challenges. The 2024 PDP draft included 10,000 MW of BESS, but this may see ...

The company plans to establish a state-of-the-art lithium-ion battery cell manufacturing facility in Thailand's Eastern Economic Corridor (EEC), marking a significant milestone for the ...
