

The longest wind blade

Sany's new turbine blade is expected to be used for its 10 MW turbines at an onshore facility in Germany. It makes them the longest blades on land.

SANY Renewable Energy, a wind turbine manufacturer in China, has built the world's longest onshore wind turbine blade. The SY1310A is 430 feet (131 meters) long and rolled off the ...

The world's longest wind turbine blade, at 88.4 meters, has successfully completed its first journey - perhaps as the largest cargo ever transported on danish roads.

In fact, the design size of this blade has been proposed for a long time, but this is the first time that the blade has been officially produced. The new blade has also broken the record of GE's LM 107 meter ...

China's wind turbine manufacturing giant, SANY Renewable Energy, has recently developed the world's largest onshore wind turbine blades. At a length of 430 feet, the SY1310A ...

Sany Renewable Energy, a Chinese wind turbine manufacturer, has built the world's longest onshore wind turbine blade, the SY1310A, which is 430 feet (131 meters) long. The SY1310A ...

The first set of 131-meter-long onshore wind turbine blades, the longest in the world, have been successfully produced in Bayannur, north China's Inner Mongolia Autonomous Region, ...

? The 153 meters of the largest wind turbine blade in the world, put to the test Dongfang Electric (DEC) has unveiled the largest wind turbine blade ever manufactured worldwide.

The world's largest-ever onshore wind turbine blades have been manufactured in China. At 131 metres in length, each foil would dwarf Big Ben or the Statue of Liberty.

Currently the longest wind turbine blade is 88.4 metres, produced for an 8 MW offshore turbine. Photo: LM Wind Power, 2017.
