

# UK Government Energy Storage System Rankings

Government have been working closely with Ofgem to deliver the Technical Decision Document, which sets out details on key decisions for the regime, including, eligibility, application windows,...

This edition of the EnergyPulse report on Energy Storage shows there is 8.7GW of batteries in operation and under construction and more than 30GW projects have now been consented.

This could see the first significant long duration electricity storage (LDES) facilities in nearly 4 decades, helping to create back up renewable power and bolster the UK's energy security.

Over & #163;32 million government funding has been awarded to UK projects developing cutting-edge innovative energy storage technologies that can help increase the resilience of the UK's electricity grid while also ...

From the caverns of Teesside and the reservoirs of Scotland to futuristic cryogenic tanks near Manchester, the UK is assembling a flexible, secure and low-carbon energy storage landscape.

In the past decade, the cost of energy storage, solar and wind energy have all dramatically decreased, making solutions that pair storage with renewable energy more ...

The pipeline of grid-scale BESS projects with planning approval in the UK has now reached 58,270MW/121,645MWh in capacity. That's according to the latest data from Solar Media Market ...

In March 2024, the House of Lords Science and Technology Committee said increasing the UK's long-duration energy storage capacity would support the UK's net zero plans and energy security.

We think we can contribute to the significant increase in storage deployment required to support the net zero transition by helping address problems with revenue risk and market capacity. Here, we set out how we ...

UK energy regulator the Office of Gas and Electricity Markets (Ofgem) has cleared 77 long-duration energy storage (LDES) projects to proceed to the assessment phase of the government's LDES cap ...
