

Ukraine air energy storage project

The project, worth approximately 3 billion hryvnias (around EUR67 million), aims to create one of the largest energy storage systems in Eastern Europe. The consortium includes Oschadbank, ...

Commercial operations and service delivery under the contract with Ukrenergo are scheduled to start in October 2025. Due to the war and limited access in Ukraine, this is the first ...

DTEK and Fluence launch Ukraine's largest battery energy storage project, capable of powering 600,000 homes and expected to reduce the risk of outages

DTEK and American Fluence completed the construction of the largest energy storage system (BESS) in Eastern Europe. The project will ensure stable electricity supply to Ukrainians, ...

Ukraine's biggest private energy firm, DTEK, has launched a major battery storage facility that will bring power to hundreds of thousands of homes and strengthen the grid ahead of expected ...

As Ukraine faces its fifth wartime winter, distributed flexible power generation and BESS are urgently needed to preserve the power system and ensure Ukrainians have electricity and ...

In Ukraine, where winter temperatures often fall below freezing, GSL ENERGY successfully deployed a 160kW / 418kWh liquid-cooled energy storage system (ESS) designed for ...

The project includes six battery energy storage systems of varying capacities - from 20 to 50 MW each - connected to the Ukrainian power grid. Collectively, the systems have the capacity ...

In just six months -- under shelling, blackouts, and wartime restrictions -- Ukraine completed Eastern Europe's largest battery storage project: 200 megawatts / 400 megawatt-hours of ...

Fluence has successfully completed the largest battery-based energy storage project in Ukraine, showcasing its leadership in energy storage solutions. The project was constructed and ...
