Italy has agreed to a Vatican plan to turn a 430-hectare (1,000-acre) plot of land north of Rome into a vast solar farm that will generate enough electricity to meet the needs of Vatican City.

The project aims to meet the full energy needs of both the Vatican State and Vatican Radio using solar technology integrated with agricultural activity.

Discover how photovoltaic energy storage transforms residential power management, with real-world insights from the Vatican's green initiatives. Explore cutting-edge solutions balancing environmental ...

We are an international project developer of wind, solar and battery storage (BESS) projects. Our activities include the planning, development and construction of these projects, as well as their ...

A solar panel system is being built on the 424 hectares of extraterritorial land in Ponte Galeria, which within a year will make the Holy See the first zero-emission state in the world.

The Vatican's solar shift is a culmination of a political and spiritual mission years in the making. In 2024, the late Pope Francis issued an apostolic letter ordering the construction of an ...

While not directly involved in the Vatican project, companies like EK SOLAR specialize in heritage-compatible solar solutions. Their patented "Invisible Solar" technology has been deployed in over ...

Welcome to Vatican power storage ambitions - where ancient walls meet cutting-edge renewable tech. With just 825 residents, you might wonder why this microstate's energy projects ...

Italy agreed Thursday to a Vatican plan to turn a 430-hectare field north of Rome, once the source of controversy between the two, into a vast solar farm. The Holy See hopes it will generate...

The transition to solar energy aligns with the teachings of Pope Francis, particularly highlighted in his encyclical, "Laudato Si", which calls for urgent action on climate change.
