

The Asia Pacific region is experiencing a robust expansion in the glass for solar cell modules market, driven by escalating investments in renewable energy infrastructure, supportive government ...

"Once a strategic workaround for Chinese manufacturers aiming to access Western markets, Southeast Asia now faces growing constraints. In response, some producers are redirecting ...

The arrival of factories backed by Chinese solar heavyweights such as Trina, Longi, JA Solar and Jinko Solar, among nearly 20 other competitors, has transformed Malaysia, Vietnam, ...

Discover the innovators driving 82% of global solar deployment with breakthrough technologies and record installations. In 2025, Asian manufacturers have solidified their position as global solar ...

India, the US and West Asia are together expected to add 100 GW of solar capacity in 2025, while China will remain a dominant player in the sector, Wood Mackenzie has said.

As part of its global growth strategy, Jakson Group plans to begin exporting solar modules to the US, Europe, West Asia, and other international markets from the next financial year.

With the solar market in Europe slumping due to a fall in electricity prices, India is looking to tap into new export opportunities in the United States and the West Asia, government sources told ...

As of the end of 2023, the combined module capacity in Indonesia and Laos reached 3.5GW. Among overseas manufacturers, SEG Solar, Apollo, and New East Solar all have expansion ...

Dive into the heart of the solar industry, exploring the latest maps showcasing existing and future solar module manufacturers alongside their critical suppliers in solar cells, wafers, ingots, and polysilicon.

ACI researchers answered these important questions by conducting a comprehensive solar PV supply chain mapping. Within the supply chain, the most essential components are solar PV ...
