

# Which countries use solar power

Which country uses the most solar power?

Solar power is the fastest-growing renewable energy source in the world. But what country uses the most solar power? The leader in solar energy is China, at 306,973 MW total solar capacity, but that's due to its colossal size; solar power accounts for only around 3.5% of total energy consumption.

Which countries have installed solar power?

Over a year, Italy was one of the leading countries in Europe for the installation of solar, but again Italy is adding capacity of solar power installed in every area through a mix of small-scale and utility-scale installations. 10. South Korea - 26,645 MW (Growth: 13.4%)

How much solar energy does the world use?

That may seem like a colossal amount, but world solar energy consumption has only reached around 3.63%. Solar energy is the most abundant energy resource on the planet -- 173,000 terawatts of solar energy reaches the surface continuously. Fortunately, solar power growth worldwide has been steady and strong.

Which country has installed the most solar power in 2024?

In 2024, China has installed more solar than the entire capacity of most countries combined, which is astonishing, 278,000+ MW, which is just not making China the leading country in the installation of solar power, but China is setting the global pace in solar power installation. 2. United States - 177,470 MW (Growth: 27.5%)

Our rundown of the countries around the world using the most solar energy, from Mexico to China

Top 50 Countries That Use the Most Solar Power as a Percentage of Their Total Consumption Solar power is the fastest-growing renewable energy source in the world. But what country uses the most ...

The Asia-Pacific region is leading the solar energy transition as of 2023. Which countries are building the most solar power?

Explore which countries use solar energy the most and how global solar power adoption continues to grow across regions in 2026.

Solar power is the fastest-growing renewable energy source globally, with China being the leader in solar energy usage. With a total solar capacity of 306,973 MW, China has the highest ...

Solar power is rising fast as countries aim to reduce pollution and switch to renewable energy sources. The top 10 solar power nations are setting global examples by using sunlight to ...

What We're Showing This treemap chart shows the state of the world's solar photovoltaic (PV) installations as of 2024, broken down by region with the top 15 countries labeled. The chart's ...

## Which countries use solar power

Discover the top countries with the most solar power installed in 2025. Explore global solar growth trends, annual installation rates, and how nations are embracing clean, renewable ...

Discover the top 5 countries leading in solar power adoption in 2025, ranked by capacity, growth, and innovation. See who's powering a clean energy future!

Solar is a popular and growing energy source worldwide - learn which countries use the most solar PV and have the highest solar potential.
