

# Wholesale 220v power station in Denmark

What happened in the Danish wholesale electricity market in 2022?

In 2022, there have been several central events in the Danish wholesale electricity market. Table 1 summarizes these main events, regulatory changes, and developments in the Danish wholesale electricity markets, which have taken place in 2022. DUR approves Energinet's method for purchasing energy for counter trading.

Is Denmark a net importer of electricity?

Denmark was a net importer of electricity with 1.4 TWh net imports in 2022. Denmark has been a net importer since the year 2011. Net imports have decreased 72 pct. in comparison to 2021, mostly brought about by an increase in domestic production coupled with a decrease in energy usage.

How much electricity does Denmark use in 2022?

The Danish electricity consumption was 35.5 TWh in 2022, which is a decrease of 3.1 pct. compared to 2021. The electricity consumption is larger in winter than in summer because of the increased need for heating and light. The largest monthly consumption was in January (3.5 TWh) while the lowest was in July (2.6 TWh).

How much electricity does Denmark import from Norway?

Denmark imported most electricity from Norway (7.9 TWh) and exported most to Germany (8.2 TWh). The average available capacity for trade on the cross-zonal transmission lines in 2021 was 82 pct. of the nominal capacity, in the export direction. In the import direction, it was 85 pct.
