

# Yichang shares lithium battery energy storage

On September 26, CORNEX held a groundbreaking ceremony for a new-generation 80GWh lithium battery project in Longquan Town, Yiling District, Yichang. This project is one of three ...

The facility will manufacture next-generation 700+Ah energy storage battery products to serve leading global energy storage customers. Operations are expected to commence in 2026, with ...

In the rapidly advancing solar landscape, Lithium battery energy storage in Yichang business park plays a pivotal role in enhancing grid resilience and energy autonomy.

On January 8, the Infund Holding Group and the Zhijiang government inked an agreement to invest 5.5 billion yuan (US\$810 million) in a sodium and lithium battery new energy ...

Designed to be a leading smart energy equipment manufacturing hub, the park will integrate vanadium flow batteries, flywheel energy storage systems, and hybrid renewable energy storage solutions.

It will focus on the research, development, and production of new energy products such as power batteries, energy storage batteries, and PACK modules. Upon reaching full production, the ...

The core task of the Yichang new generation lithium battery project is to focus on achieving large-scale, low-cost manufacturing of cutting-edge technologies through its location and ...

On September 26, the groundbreaking ceremony for the new-generation 80GWh lithium battery project by CORNEX in Yichang was held in Longquan Town, Yiling District.

In Yichang, various types of energy storage technologies are being explored as part of a multi-faceted approach to energy management. These technologies range from traditional ...

The total planned land area of Yichang CORNEX Industrial Park Project is nearly 333.33 hectares. It is a high-tech industrial base integrating the R&D, production and manufacturing of ...
